

The Vertiv(TM) SmartRow(TM) 2 (SR2N05020FAA1) is a complete edge data center solution offering 20kW of IT load capacity across 5 IT racks. Engineered for high-density environments, it features integrated ...

Microsoft, Meta, and Google are working with OCP partners to design a new power rack side pod that the companies say will enable IT racks to reach densities of up to 1MW per rack.

This blog outlines best practices for data center area planning per rack, segmented by power density levels (5-12 kW, 12-20 kW, and >20 kW), and based on the industry-standard space allocation model:

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and future-proof your IT infrastructure.

PRIME's Modular Data Centers are a prefabricated and efficient solution for 5G Macro Sites and Enterprise applications. The Natural Air Cooling system cuts energy costs dramatically - using 75% ...

Maximize cooling performance with the CR020RA Air-Cooled 20kW unit, designed for high efficiency in data centers and industrial applications.

UL-certified crypto mining containers, indoor/outdoor data center racking, encompass everything you need to get up and running--in as little time as possible.

AI, HPC (High-Performance Computing), and GPU-driven workloads are pushing rack densities beyond 20kW -- often reaching 30-60kW per rack in advanced environments. This trend is ...

Designed to meet IP54 standards, the IT rack and cooling enclosures protect equipment from dust and splashing/dripping water as well as physical and environmental conditions found in factories, ...

The Vertiv(TM) DCE Rack System is designed to meet the flexibility, ease of installation, and delivery requirements of modern data centers, and is available in pre-configured or customized builds.
