

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with the...

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue components provide additional, undocumented communication channels that could allow ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to ...

May 29, 2019 &#183; The station houses two ABB central inverters and embedded auxiliary power, monitoring and air filtration systems. It enables easy and rapid connection to a MV transformer

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

U.S. energy officials are intensifying scrutiny of Chinese-manufactured power inverters, critical components in renewable energy systems, after discovering undocumented communication equipment ...

Discover how a grid-connected photovoltaic inverter and battery system enhances telecom cabinet efficiency, reduces costs, and supports eco-friendly operations.

U.S. energy officials have intensified scrutiny of Chinese-manufactured components in renewable energy infrastructure after the identification of undocumented communication devices embedded in power ...

Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters reports. This has prompted...
