

Meanwhile, British company Build Solar has created glass bricks that generate electricity from solar power. This can be used to replace the glazing in buildings, offices and bus shelters.

SunGuard [®] Solar is a commercial solar control glass that helps to reflect the sun's energy. Making it ideal for applications when excessive solar heat gain could result in uncomfortable living environments. Its reflective ...

The NSG Group offers a range of specialised glass and coated glass products used in all of the leading solar energy technologies, including thin film photovoltaics, crystalline silicon photovoltaics, concentrated solar ...

Our transparent solar glass panels are available in various transparencies allowing light in whilst providing clean solar energy. Take a look through our completed projects for inspiration or a better understanding of things ...

As a fully integrated company, AGC offers a full range of products dedicated to CSP applications: from sand and low-iron float glass substrates made by our highly specialised float glass plants to high-end solar mirrors.

Explore premium solar glass, aluminium framing, and precision fabrication for energy-efficient architecture and infrastructure in the UK.

We provide an extensive selection of high-performance products, including Solar Control & Low-E coatings, fire-resistant glass, and more. Our bespoke glass manufacturing combines advanced technology with expert ...

Solar control glass can be specified for any situation where excessive solar heat gain is likely to be an issue, eg. large facades, glass walkways, atria and conservatories.

This unique British-designed solar electric glass, which can be incorporated into the structure of a building to produce clean electricity, is to go on sale in the UK later in the year and could revolutionise the use of ...

Discover our innovative solar glass designed to enhance energy efficiency and sustainability. Learn how it improves solar panel performance.
