

Does Costa Rica have an electric vehicle market?

The first six months of 2024 saw Costa Rica's electric vehicle market surpass a 15% market share. That's impressive enough, but what really grabs attention is what happened in July. EV registrations in the country spiked by an unbelievable 197% year-on-year. That's right--nearly double the sales from July of the previous year.

Does Costa Rica have an EV boom?

Costa Rica is quietly revolutionizing its vehicle market, and if you're not paying attention, you might miss one of the most impressive EV booms in the Americas. Electric vehicles (EVs) are taking off in this tropical paradise at a rate that's turning heads globally, with market growth that's hard to believe.

How much does an EV cost in Costa Rica?

As of now, there are 11 electric vehicle models priced under \$25,000 in Costa Rica--compared to just six in neighboring Colombia. The Geometry E, in particular, ignited a price war that pushed Costa Rica's EV market to new heights. This model is now \$2,000 cheaper than when it was first introduced, a significant factor in the market's growth.

What is Costa Rica's EV market share?

This surge has propelled Costa Rica's EV market share for July to a whopping 27%, well beyond expectations, bringing the year-to-date figure to around 16-17%. To put this into context, Costa Rica's EV sales in the first seven months of 2024 are already 10% higher than the entire EV sales of 2023, when the market share was 11.7%.
