

Renewable ammonia, sourced from more than six different locations around the world, will be stored and distributed from Krk. The 153-hectare freehold property has direct access to a ...

Croatia's Rimac Energy, a pioneer in advanced battery energy storage systems (BESS), has recently opened a new 1850 m2 facility in Witney, Oxfordshire to house its rapidly growing team in the UK ...

Gasfin / Adria Polymers is partnering up with and giving to North Adriatic Hydrogen Valley access to Green Energy through a deep seaport location, the Green Energy Park, at the Island of Krk, Croatia

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Green Energy Park (GEP), a prominent project developer, has unveiled ambitious plans to establish a renewable ammonia facility in Piauí, Brazil, with the objective of exporting this eco-friendly ammonia ...

This article examines ATESS' pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, highlighting key projects across various factories and ...

This article explores how advanced battery technologies and smart grid solutions are reshaping industrial energy management while addressing common challenges in renewable integration.

Over the past decade, Croatia has emerged as a leader in renewable energy integration, particularly in combining wind farms and solar parks with advanced battery storage systems.

According to Green Energy Park, the GEP Krk hub will have ten million tons of annual capacity for green ammonia import, storage, and distribution annually. It is equivalent to 1.8 million tons of hydrogen.

Green Energy Park Krk is a unique midstream facility by the North Adriatic Sea. It is strategically located on the island of Krk, Croatia. Its deepwater seaport and terminal infrastructure are key for unlocking ...
