

Is Taiwan a green power market?

In May 2020, Taiwan completed its first green power wheeling, with a total volume of over 110 million kWh, marking the first year of green power trading in Taiwan. To date, Taiwan's green energy market has experienced a persistent supply shortage, resulting in high prices and have attracted more and more renewable energy generators to the market.

Who monopolizes Taiwan's electricity market?

Taiwan's electricity market has long been monopolized by the state-owned Taiwan Power Company(Taipower),including generation,sales,transmission,and distribution. In 2017,Taiwan made significant amendments to the Electricity Act,opening up competition in generation,sales,and other electricity services to private enterprises.

Why are green energy prices so high in Taiwan?

The trading mechanism in Taiwan's green energy market is much more stringent than in other Asian countries,and the threshold for entry is relatively high,as most transactions are based on the signing of PPAs. Therefore,the lack of access and the high prices caused by insufficient supplyare major obstacles for many buyers in Taiwan.
