

Charge/Discharge Energy Efficiency: 94.5%@0.5P Thermal Management: Liquid cooling Operating Temperature Range : -30?~55? Storage Temperature Range: -30?~55? Fire Protection System: ...

Equipped with intelligent voltage and temperature acquisition modules to improve utilisation efficiency. Different module combinations to meet the needs of different application scenarios. IP67 protection ...

It perfectly combines 52.25kWh high energy density with Pack-level safety protection, providing a high-performance, stable, and reliable energy storage solution. Battery Cell Type: LFP 314Ah ...

Whether it is a re-developed battery energy storage system or an existing BESS, it needs to be discussed on the technical meeting for confirming the client's demands with all significant details.

Liquid Cooling Battery Pack P1P52-280 is 1P52S structure, mainly composed of 280Ah high-quality LFP cells.

The P530H201 liquid cooling server rack battery is consisted of 52pcs MB31 314ah lifepo4 battery cells configured by 1P52S, and is integrated with VCMU, fuse, MSD and other components inside.

ECO-P1P52LS | SHANGHAI ELECNOVA ENERGY STORAGE CO., LTD. The liquid-cooled PACK consists of LFP cells, grouping in 1P52S.

Product name:LFP 1P52S liquid cooling battery pack for energy storage system Brand:Lithium innovation Voltage range:104-189.8V Nominal voltage:166.4V Nominal capacity:280Ah Nominal ...

Excellent thermal management performance: The liquid cooling system can efficiently take away the heat generated by the battery during the charge and discharge process, so that the temperature ...

Description This series of liquid cooled energy storage battery pack uses lithium iron phosphate (LFP) battery cell and intelligent liquid cooling cooling technology, specially designed for industrial and ...
