

How much do solar panels cost in Europe?

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

Will EU-made solar modules be more expensive than Chinese imports?

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap and help reach the EU's 30GW annual manufacturing target by 2030.

How much does reshoring solar module manufacturing to Europe cost?

The 'Reshoring Solar Module Manufacturing to Europe' report offers a cost gap analysis and policy impact simulation, which finds that producing a solar module in Europe with EU-made solar cells costs around 10.3 EURct/Wp more than producing the same module in China.

A report by SolarPower Europe and Fraunhofer ISE finds EU-made solar modules cost EUR0.103 (\$0.12)/W more than Chinese imports, but targeted policies could close the gap and help ...

This stability is supported by the EU's 2030 renewable energy goals and a projected ~10% growth in PV installations, though grid delays and rising module prices - due to reduced ...

The European market for photovoltaic (PV) modules witnessed a significant period of stability in October 2025, with prices settling "at the bottom" after a period of decline. This newfound ...

PV module prices in Europe have risen after months of decline, driven by price increases from Chinese manufacturers and a tight supply of popular modules.

Comprehensive guide to solar module prices in 2025. Current costs, market trends, buying strategies, and price forecasts. Updated with latest data.

This has driven up prices for n-type monofacial solar panels and n-type bifacial solar panels as buyers continue to favor the brands of top manufacturers. Both monofacial and bifacial n ...

Updated photovoltaic module prices 2025: in August, high-efficiency solar panels fell to an average of EUR0.12/Wp in Europe.

The European PV module market has recently shown a trend of price rebound and demand recovery, driven by seasonal demand, rising supply chain costs, and policy support.

The "Reshoring Solar Module Manufacturing to Europe" report offers a cost gap analysis and policy impact simulation, which finds that producing a solar module in Europe with EU-made ...

PRICE INDEX | January 2026 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main ...
