A flat is a set of rooms for living in, usually on one floor and part of a larger building. A flat usually includes a kitchen and bathroom.

NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems.

The flat() method is a copying method. It does not alter this but instead returns a shallow copy that contains the same elements as the ones from the original array.

If you included a single-axis tracking system on the same array, it would drive the cost up to about \$20,000. That's a premium of 57% over the cost of the fixed array for just 35% more solar output.
