

Over 8 GW of battery energy storage has been deployed on the ERCOT power system to date. "Battery storage is the fastest, scalable solution to provide reliability in the near-term to the...

Currently, e-STORAGE operates fully automated, state-of-the-art manufacturing facilities with an annual battery energy storage system capacity of 15 GWh and battery cell capacity of 3 ...

Officials said the state added about 6.4 GW of energy storage capacity in 2024, and more than 12 GW of storage has been deployed on the ERCOT system to date. Officials have said ...

Texas is expected to continue adding large amounts of energy storage capacity to its grid, with nearly 4.5 GW currently under construction and an additional 7.3 GW in the pipeline.

Across Texas, fenced lots of shipping-like containers are popping up amid the oil derricks and wind turbines that have defined the landscape. These battery storage systems are revolutionizing...

Battery storage systems like Freetown. They're solving the "sunset problem" - storing solar energy for night use and preventing blackouts during extreme weather.

Because Texas runs its own electric grid through ERCOT, we can't rely on other states for backup. So when it comes to keeping the lights on here, battery storage is about as ...

An energy company is pulling out of plans to build a controversial battery storage facility in a small unincorporated Texas Hill Country town.

Revolution battery storage project in Crane County, Texas, is a large-scale battery energy storage facility developed, owned and operated by Spearmint Energy, designed to provide grid stability and ...

Spearmint Energy began construction of the Revolution battery energy storage system (BESS) facility in ERCOT territory in West Texas just over a year ago. The 150 MW, 300 MWh ...
