Georgia Power announced that construction is underway on 765 megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, ...

Georgia Power, the state's largest utility, has revealed details about where it will install its next set of massive batteries, part of its plan to meet a wave of electricity demand the company...

Georgia Power has issued a request for proposals (RFP) to develop 500 MW of new battery energy storage projects, with systems required to provide at least two hours of discharge ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

In total, 765 megawatts (MW) worth of new BESS will be strategically located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties.

Construction is underway at four new battery energy storage system sites located across Georgia, including one in Bibb County, totaling 765 megawatts of power.

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC) on Thursday to mark commercial operation of the company's first "grid ...

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

The EPC is Crowder. It will utilize lithium iron phosphate Tesla Megapack 2 XL batteries, which will be paired with an existing solar project at the base. It's expected to be online in 2026.

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.
