

Is Guatemala a good place to invest in solar energy?

Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give the country a strong potential for increased solar energy development.

Why did BMR decide to buy a solar farm in Guatemala?

As part of its evaluation process, BMR determined that the solar farm offered a strong return that was supported by Guatemala's well-established and stable regulatory system. BMR navigated a complex and cooperative sales process that involved four owners across three legal jurisdictions.

How does green solar work?

Reduces greenhouse gas emissions by 10,000 tons of CO₂ equivalent per year. Local Guatemalan staff provide support for all operation, maintenance and commercial management at the site. The original owners of the Green Solar project approached BMR seeking financial investment.

Guatemala has seen previous projects in solar energy, including the announcement of a 5 MW PV project in 2014 and a subsequent tender for a 110 MW project in 2019, which was later ...

Guatemala approves grid connection for 75 MW Tierra del Sol Solar Project The project includes over 168,000 solar panels and 240 inverters, and will connect to the national grid via the ...

Spanish renewable energy company Ecoener is developing two major solar plants in Guatemala, Yolanda and El Carrizo, with capacities of 74 MW and 75 MW, respectively. Situated in ...

Guatemala's power regulator CNEE has approved the application by Tierra del Sol for the 75MW Tierra del Sol solar park, which will be situated in the municipalities of Masagua and ...

Context Guatemala is the second largest Central American power market, with a goal to increase renewable energy use. Relatively high levels of solar irradiance and large areas of cleared land give ...

The 5 MW Don Jorge solar project sets a benchmark for Guatemala's distributed renewable generation model, deploying Huawei FusionSolar technology to avoid 13,000 tonnes of ...

Explore our new 189 kW solar project in Guatemala City, featuring 342 Atlas 550W panels driving sustainability and clean energy.

Solarpack has received approval to build the 75 MW Tierra del Sol solar park in Guatemala. Learn how this project will power 89,000 homes and advance the nation's renewable ...

Guatemala's National Electric Energy Commission (CNEE) has approved transmission access for the 75 MW

Tierra del Sol photovoltaic project in Escuintla, set to begin operations by ...

Guatemala sumará 413 MW de energía limpia con nuevas plantas solares que se encontrarán en diferentes sectores del país, desde la Costa Sur hasta el oriente.
