

I share practical DIY projects, solar power setups, and off-grid tech to help you take control of your energy and lifestyle.

Whether you're an experienced DIY enthusiast or a curious beginner looking to explore solar, we're here to empower you with the knowledge and tools to build, maintain, and optimize your own solar systems.

Learn the essentials of rearing ducks for a sustainable off-grid lifestyle with our expert tips and tricks for successful duck farming.

Got ducks, looking for solar advice. Recently hatched some ducklings (6) and thought a large kiddie pool would be sufficient for them later on, 4 months later now and I felt bad for them (they ...

An alternative solution might be to switch to a different pump controlled by a solar pump controller. You only need three items, the pump, the controller, and the panels, with no battery.

Ok, so even if a larger cost initially, we're pretty eco-friendly people and have plans to add other electronics back there down the road so we travel down the solar panel + battery bank idea.

I have a small pond. Professional filter systems are quite expensive. So I decided to build my own solar powered pond filter with skimmer. I kept the build simple with easily available items.

This innovative DIY duck coop design features a small solar panel for energy, making it an environmentally friendly option for your suburban backyard. Painted in bright colors, this coop stands ...

Whether you're an environmental enthusiast, a fan of alternative energy, or simply someone who appreciates innovative design, you won't want to miss this incredible showcase of eco-friendly homes...

This is a better option than using batteries to provide night irrigation, simply use solar power during the day to pump water to a turkey nest dam elevated on a hillside or large header tank on ground at least ...

Our Great Pyrenees puppies got their very own run to explore and guard. I started installing our solar energy system to power the parts of the homestead.
