

# How much does it cost to install the photovoltaic panel bolts

How much does solar panel installation cost?

Let's look at how much solar panel installation costs. The cost of solar panels varies hugely depending on the type and size of the system you require. A 4kW photovoltaic (PV) system, suitable for a 2-3 bedroom house typically costs around £8,000 (incl. installation). Including an inverter and solar battery takes the average cost to around £12,000

Will adding a solar battery increase my solar panel installation costs?

Adding a solar battery will increase your solar panel installation costs. Generally speaking, it's more cost-effective to install your solar battery system at the same time as your solar panels (rather than adding it later on). Read our solar battery storage system cost guide for more detailed information.

How much do commercial solar panels cost?

Solar panels for businesses. Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does solar cost per watt?

For reference, the national average cost of solar panels is \$3.03 per watt. Solar rebates help make solar more affordable by directly lowering the upfront cost of a solar installation. If you have access to solar rebates, consider yourself lucky! They are few and far between these days.

Discover real solar panel installation costs, potential savings, and how to calculate your return on investment with accurate data and expert insights in 2025.

Key takeaways Average home solar panel installation costs: \$21,816 Average solar panel cost per watt: \$3.03 Average cost of solar panels per square foot of living space: \$9.34 per square foot Average ...
