

How important are solar photovoltaic rental rights?

Renewal rights are potentially important, as it is anticipated that the productive life of the solar photovoltaic ("PV") array equipment may be substantially longer than 20 years. Rent can be structured in several ways.

How can you make money from a solar roof?

Solar rooftop leasing is one of the three basic ways you can make money from your rooftop with solar energy. The other two involve owning and operating solar panels on your own roof and joint venturing with a developer who will install the solar panels and share the income with you.

Should you rent a roof if you have a PV system?

As a result, in any rooftop lease agreement, you need to know who is going to pay if roof repairs are needed, especially if PV system removal is required. In simple terms, if maintenance is not an integral part of the lease agreement, roof rental is not likely to be a lucrative deal in the long run.

Can solar panels be installed on your roof?

While a growing number of property owners are investing in the installation of solar panels on their roofs - a new group of small to independent developers began exploring the feasibility of leasing rooftops, attracting investors and raising the money to pay for the solar installations.
