

The company, SolarKonstrukt, specializes in designing and building both grid-tied and off-grid residential solar power systems, emphasizing renewable energy solutions and environmentally friendly practices.

We were among the first to build solar power plants in Hungary. We have been building complex residential and industrial solar systems for more than a decade. We believe that quality is an investment that pays off in the ...

The Hungarian Solar System Engineering Company specializes in designing and implementing advanced solar solutions tailored to industries like utilities, transportation, and commercial sectors. Their systems address ...

Full Engineering, Procurement and Construction Services for photovoltaic systems, battery energy storage systems (BESS) and energy management systems (EMS). We provide full procurement support with ...

The system produces electric energy and algae or high-tech production facilities in the greenhouse from the same solar radiated area. The most application area is a greenhouse, green buildings.

The ASTRASUN Solar Kft. (earlier as Candimpex Budapest Kft.) has opened consciously to the renewable energy market since 2014. The core elements of its activity today are the design, construction, operation ...

Hungarian solar system manufacturers are making waves in renewable energy markets, combining Central European engineering precision with cutting-edge photovoltaic technology.

During this time, we have developed and constructed nearly 150 solar power plants and industrial solar systems with a total installed capacity of 280 MW, and our partners also entrusted us with operating a significant ...
