

Iceland will build a large energy storage power station

Located in Iceland, construction is expected to last 18-24 months before operations start. Today is a very important day for Climeworks and for the industry as construction begins on our newest, large-scale ...

This year, the club returned to see Mammoth, Climeworks' newest and largest direct air capture and storage facility in the world, with a nameplate capacity of up to 36,000 tons of CO2 removed per year. ...

Meet the Qingxi Pumped Storage Power Station - the unsung hero making Iceland's 99.9% renewable energy grid possible. This hydraulic giant isn't just another power plant; it's Mother Nature's backup ...

Meet the Qingxi Pumped Storage Power Station - the unsung hero making Iceland's 99.9% renewable energy grid possible. This hydraulic giant isn't just another power plant; it's Mother ...

Imagine a world where volcanic landscapes power cities without fossil fuels. That's exactly what the Reykjavik lithium battery energy storage power station aims to achieve. As one of Europe's most ...

On Thursday, 16 June 2025, Mr. Jóhann Pál Jóhannsson, Minister of Environment, Energy and Climate, formally opened the Silverstone facility by Carbfix at Hellisheiði Geothermal Powerplant. The ...

With major installations already in place and many more - both hydroelectric and otherwise - yet to be built, the Icelandic National Power Company has just announced its plans.

The geothermal power plant at Hellisheidi Mountain near Mount Hengill is currently among the largest geothermal power stations globally. It has an electrical generating capacity of 303MW and ...

In this post, I want to explore how Iceland Carbon Capture and Storage actually works, why Iceland is the perfect place for it, and what lessons the rest of the world can take from this ...

Hellisheidi Hot Water Production and Supply
Hellisheidi Cold Water Production and Supply
Contractors and Suppliers Involved in The Hellisheidi Power Project
Orca CCS Plant Details
The Orca CCS facility, located adjacent to the Hellisheidi geothermal power plant, captures carbon dioxide (CO2) directly from the air and stores it permanently as rocks in the earth's crust. The Orca carbon capture plant was developed and is operated by Climeworks, a direct air CO2 capture technology company based in Switzerland. Icelandic company...
