

You know, when we talk about China's solar power surge, most people immediately think of Shanghai's floating farms or Gansu's mega-projects. But here's the thing - Inner Mongolia photovoltaic bracket ...

The project is located in the Inner Mongolia Ordos High-tech Zone, where a high-efficiency photovoltaic module research and production base will be established in the desert area.

The project is located in the Inner Mongolia Ordos High-tech Zone, where a high-efficiency photovoltaic module research and production base will be established in the desert area. ...

Seeds of desert plants are pictured at an integrated sand control and photovoltaic project at a state forestry area on the edge of Ulan Buh Desert in Linhe District of Bayannur, north China's ...

According to the announcement, a new workshop and eight production lines will be built to reach a production capacity of 200,000 MT of solar bracket per year. The BIPV will be applied in ...

On November 17th, the Elion DAS Solar 4GW high-efficiency photovoltaic module project, jointly funded by Elion and DAS Solar, went into production in Inner Mongolia, ...

This marks the first project among Inner Mongolia's four large-scale wind and solar energy bases in desert areas to achieve a combined 2 GW grid connection. It is also the first project ...

DAS Solar has announced that its 4GW high efficiency module project, jointly funded with Elion, has commenced production in Inner Mongolia. The project is located in the Ordos High-tech ...

The use of single-axis trackers allows the photovoltaic panels to automatically rotate to follow the sun, greatly improving power generation efficiency. The project has also innovated with ...

The photovoltaic bracket project of Yiheng New Energy Co., Ltd. is one of the key projects to complement the new energy industry chain in Dalate Banner. The planned production ...
