

Installation of photovoltaic panels on resin tiles

Can you put solar panels on roof tiles?

Putting solar panels directly on top of tiles is a no-go-- they'll break. Drilling through the tiles may result in damage to the underlayment, the base layer of your roof. Some installers choose to take out specific roof tiles and put in special mounts for the solar panels or even add a racking system.

Can a solar system void a warranty on a tile roof?

Installing a solar system may void the warranty for your tile roof. Contact the provider for more information. 3. Make sure the roof is waterproof. Proper flashing and waterproofing are crucial to prevent leaks. Use sealants around mounting brackets and penetrations to prevent moisture from seeping under the tiles.

How do I choose a solar panel installer?

1. Find a good installer. Experience and competence are especially important with tile roofs. Maintain open communication with your solar panel installer throughout the process. It should be clear who is responsible for the damage caused to the tiles that may occur during the process. 2. Check the warranties.
