

Instructions for Use of 200kW Outdoor Communication Cabinet

How do I connect a battery cabinet to a UPM?

If Integrated Battery Cabinets (IBCs) are installed, close the IBC battery breakers. Press the DC Start button on the front of each UPM to power on the UPM power supply. (See Figure 63 for DC Start Button location).
Figure 63. DC Start Button Location 10. Close the door and secure the latch. 11.

What is a 93pm integrated battery cabinet (IBC)?

Callout letters A, B, C and D map to the Oneline Schematics detailed in Chapter 6 UPS Oneline Schematics. Line-up-and-match battery wiring with a 105°C rating is factory supplied with the Eaton 93PM Integrated Battery Cabinet (IBC). The neutral conductor is sized the same as the phase conductor for balanced and resistive loads.

How does a ups cabinet work?

The UPS cabinet uses forced air cooling to regulate internal component temperature. Air inlets are in the front of the cabinet and outlets are on top or in the back of the cabinet. Allow clearance in front of and on top or in back of the cabinet for proper air circulation.

How do I prevent tipping the cabinet?

To prevent tipping the cabinet, raise the cabinet no more than 3 mm (1/8") above the floor (just enough to allow the removal of the pallet skids). Failure to follow these instructions can result in serious injury or death. **AVERTISSEMENT!**

200KWh Outdoor Cabinets energy storage system Our 200KWh outdoor cabinet energy storage system works with PowerNet outdoor control inverter cabinets for modular expansion. This means you can ...

The PPC Wireless Outdoor Cabinet is constructed of aluminum with a powder coat painted finish for reduced weight and superior corrosion resistance. The cabinet has a main front ...
