

HiTHIUM and El-Mor sign a strategic agreement for 1.5GWh of BESS projects in Israel, featuring the region's largest PV+BESS installation to support grid stability.

HiTHIUM, a global leader in long-duration energy storage technology, has announced a strategic cooperation agreement with El-Mor Renewable Energy, one of Israel's largest EPC ...

The convergence of technological excellence, entrepreneurial drive, and focus on sustainability makes Israeli energy storage innovations not just commercially promising but essential ...

The Israeli Electricity Authority (IEA) has awarded contracts for 1.5 GW of high-voltage battery storage across 11 projects in a recent tender. The awarded facilities will be developed in ...

Israeli renewable energy developer Enlight has won grid connection rights for 300 MW of battery storage capacity in a national tender, enabling the construction of systems that can store ...

In this study we explore how the location and size of renewable energy sources and energy storage systems impact the frequency stability of the grid as we focus on Israel in ...

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible energy storage demonstration project.

The government has announced plans for Israel's first stand-alone energy-storage facility, consistent with the aims underpinning a revised draft climate bill (legally enshrining targets for ...

Sodium-based batteries for storing renewable energy cheaply and the recycling of lithium-ion batteries are among the challenges to be researched at a new NIS 130 million (\$37 million) ...

The Faran solar and storage project (est. 2024) combines 21 MW of capacity and 50 MWh of storage to supply reliable renewable energy.
