

The project concerns the development of a 100MWac solar photovoltaic power plant (120 MWp), located between Obilic and Fushe Kosova, in close proximity to Pristina, in Kosovo.

The Ministry of Economy has signed three agreements with the winners of the first renewable energy auction in Kosovo*, for a photovoltaic project with a grid connection of up to 105 MW.

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.

To increase the production of renewable energy and reduce the environmental impact of the coal operations for power generation in Kosovo

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic ...

However, Kosovo needs to intensify its work on different courses to make the most of its solar potential. Solar PVs offer a cost-effective and sustainable source of energy that has been largely ...

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale photovoltaic system in ...

Known as Solar4Kosovo, this new solar plant is a key component of the EU's strategy to help Kosovo expand its renewable energy capacity and reduce its reliance on coal power.

The auction was designed to allocate 100 MW of solar power capacity, with a ceiling price of 85.5 euros per MW. This initiative is part of the government's efforts to diversify its energy ...

This project is designed to maximize land use efficiency while maintaining ecological integrity. With the exception of the entrance area, all other sections of the project, including module partition areas and ...
