

What is Tesla's new deal with LG Energy Solution?

The new deal comes only months after Tesla announced its first overseas battery storage production plant in Shanghai, which is expected to deliver 10,000 Megapack units within a year. Tesla Megapack. Tesla has reportedly struck a new \$4.3 billion deal with LG Energy Solution (LGES), a major South Korean battery manufacturer.

What is LG Energy Solution?

Building on its strong technological edge, LG Energy Solution aims to deliver top-tier solutions such as high-voltage mid-nickel batteries and the LFP, 46-series cylindrical batteries. In addition, the company is dedicated to achieving industry-leading performance and cost competitiveness in prismatic batteries.

What makes LG a great battery company?

Cutting-edge battery technology is accelerating the transition to a sustainable future. LG Energy Solution is driving innovation in battery safety and performance. The company is redefining the energy landscape with pioneering advancements. [National Battery Day Special]

What is LG Energy Solution doing to secure its future competitiveness?

Looking ahead, LG Energy Solution is quickly moving to secure its future competitiveness by developing next-gen battery technologies such as solid-state batteries. Regarding solid-state batteries, the company plans to lead the market by producing anodeless products that exclude lithium anodes, and 'graphite-based' anode products.

As major players increasingly invest in stationary energy storage to stabilize power grids and support renewable integration, a significant new deal is set to reshape the supply chain. Tesla ...

Tesla has selected LG Energy Solution (LGES) to supply lithium iron phosphate (LFP) batteries for its US energy storage products in a deal reportedly worth \$4.3 billion, according to ...

Cutting-edge battery technology is accelerating the transition to a sustainable future. LG Energy Solution is driving innovation in battery safety and performance. The company is redefining ...

Ownership transition reflects a mutually agreed, strategic decision by LG Energy Solution and Stellantis, undertaken in consultation with NextStar Energy. Stellantis to sell its 49 per cent ...

LG Energy Solution has announced it will take full control of Nextstar Energy, a battery joint venture that has created Canada's first large-scale EV battery factory in Windsor, Ontario.

Discover LG Energy Solution Vertech and Qcells' new partnership to deliver 5 GWh of American-made lithium-ion energy storage, boosting clean energy.

The global battery industry is at a crossroads. As electric vehicles (EVs) and renewable energy systems

reshape energy demand, the race to dominate supply chains for cost-effective, ...

LG Energy Solution (LGES) will convert NextStar Energy, the battery joint venture it set up in Canada with global automaker Stellantis, into a wholly owned subsidiary to expand production ...

Tesla partners with LG for US-made LFP batteries in new \$4.3 billion deal The new deal comes only months after Tesla announced its first overseas battery storage production plant in ...

LG Energy Solution is taking over NextStar Energy, the battery joint venture with Stellantis. The Korean company is buying out Stellantis' 49% stake. Both parties established NextStar Energy ...
