

Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

How many solar power plants are there in Laos?

However, by the end of last year, only eight solar power projects and four biomass power plants were in operation, with an installed generation capacity of 116 MW, representing just 1% of the country's total electricity production. As of early 2023, Laos produced power from 76 hydropower dams, with another 43 still under construction.

How much does electricity cost in Laos?

To its credit, state-run electricity company Electricité du Laos (EDL) is trying to encourage more solar power development by offering a tariff rate of USD 0.08 per kilowatt-hour (kWh). That's higher than the rate for hydropower-generated electricity, which ranges from USD 0.05 to 0.06 per kWh.

How much renewable electricity will Laos generate by 2035?

The Energy Market Authority has already attracted proposals for 1.2 GW of renewable electricity, to be generated in four southeast Asian nations, and wants to raise that figure to 4 GW by 2035. EDF is planning to build a 240 MW floating PV project at Laos' largest hydropower dam.
