

Latvian Thermal Power Plant Energy Storage Planning Project

The planned electricity storage station will expand the possibilities for balancing electricity capacity in Latvia and the Baltics, while simultaneously strengthening the country's energy security ...

It will be the first energy storage station in the Baltics to use Tesla technologies. This is proof to international investors that Latvia is a safe country for investments and can implement significant ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

Green Genius is currently working to integrate the plant with a 50-MW/100-MWh battery energy storage system (BESS) to support the site's operations and help stabilise the grid. Green ...

European Energy has announced the successful securing of EUR37.9 million in long-term project financing from Luminor Bank to develop a hybrid solar and battery energy storage project in ...

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in ...

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and ...

The project will comprise a 65 MW solar park and a 92 MWh battery energy storage system (BESS) across approximately 96 hectares. Once operational, it will be among the most ...

Green Genius, which invested EUR96 million (\$113.1 million) into the project, is now constructing a 50 MW/100 MWh battery energy storage system on site to turn the project into a ...
