

Leading Photovoltaic Energy Storage Laboratory

To encourage further innovation, DOE provides access to the top researchers and specialized, state-of-the-art PV equipment available at the national laboratories through solar industry partnerships.

A science-to-systems lab conducting research in manipulating matter at nanoscale dimensions to improve a multitude of thermal, solar, and electrochemical energy devices, including batteries.

Through a range of scientific, engineering, and analytical expertise, along with facilities and tools, NLR is working to ensure concentrating solar-thermal power (CSP)--with integral long ...

Energy storage is the bridge between a resilient power grid and our clean energy future. Now fully operational, AES" Luna and Lancaster Area Battery (LAB) energy storage facilities are helping ...

NLR researchers are designing transformative energy storage solutions with the flexibility to respond to changing conditions, emergencies, and growing energy demands--ensuring energy is ...

Through our dedicated labs and expertise around the world, we have created an industry-leading combination of analytical and testing experience that gives us a unique advantage in finding energy ...

Established in 2023, ESRA brings together world-class researchers from three national laboratories and eleven universities. The consortium is led by Argonne National Laboratory and co-led by Lawrence ...

NLR"s strength lies in developing and integrating a broad array of energy technologies into robust, resilient systems--addressing the entire energy spectrum, from generation to distribution to end use.

Employing some of the most respected and cited battery researchers in the world, Argonne is the U.S. Department of Energy"s lead laboratory for electrochemical energy storage research and ...

PNNL built the Grid Storage Launchpad, an innovation and testing facility to accelerate development, validation, and commercial readiness of energy storage systems. For transportation applications, we ...
