

When New Zealand's first all-electric ferry leaves the dock in Wellington Harbor, in the very near future, lithium-ion batteries supplied by Freudenberg Sealing Technologies' XALT Energy organization will ...

Vehicle-to-grid technology was successfully tested in Australia, highlighting potential future benefits for electric vehicle owners such as giving them new opportunities for energy management and potential ...

EIKTO is a world leading lithium battery innovator. They specialize in Lithium-ion battery technology development and manufacturing and their integrated PACK is suitable for a range of industries with ...

It supports a maximum input current of 20A. Australia's first lithium-ion battery manufacturer, Energy Renaissance, has received a grant to develop its pilot manufacturing facility in the Hunter region.

Construction and operation of the BESS compound, comprising up to 6,200 pre-assembled battery enclosures housing lithium-ion battery packs and related control equipment, transformers and ...

TasmanIon, established in 2021 in Wellington, New Zealand, develops advanced aluminium-ion batteries focused on safety, sustainability, and scalability for stationary energy storage.

MILLIONS of dollars of community spending looks likely to be pumped into Wellington following imminent approval of the giant battery storage project at the local power sub-station.

This review sheds light on the exciting prospects and potential breakthroughs in lithium-ion battery technology by examining emerging trends in materials, cell designs, manufacturing ...

“Wellington-based CEO wins award for groundbreaking lithium-free battery technology, addressing global energy shortages. Read more about this innovative solution!”
