

Long-term cooperation for energy storage cabinets used in field operations

Our technology uses earth-abundant iron, salt and water to deliver environmentally safe solutions capable of providing up to 12 hours of flexible energy capacity for commercial and utility ...

"The most detailed guide yet to how the Biden administration plans to conduct industrial policy for the most advanced -- and the most fledgling -- energy technologies in its arsenal."

The energy transition won't be powered by better batteries alone. It's about creating storage systems that play well with others - and frankly, that's where the real revolution's happening.

Opportunities and challenges for cooperation in deploying energy storage 6/25/24 Eric Hsieh Deputy Assistant Secretary for Energy Storage

This report demonstrates what we can do with our industry partners to advance innovative long duration energy storage technologies that will shape our future--from batteries to hydrogen, supercapacitors, ...

Long-duration energy storage (LDES) will play an increasingly important role in decarbonizing the power sector as more variable renewable energy is added to the electric power grid. LDES is defined by the ...

The forecast need of energy storage for the next 15-20 years is being mostly driven by renewable energy goals, carbon policies, economic conditions, and the retirement of conventional generation ...

Our analysis provides strong support for the future value of Antora Energy's BESS for military installations and moving forward with near-term field demonstration(s) on military installations.

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions offer remote ...
