

Longi solar light-transmitting power generation glass

Taking into account the light transmittance of the sun room, the users of the sun room now mostly adopt double-glass light-transmitting components on the roof for installation. 550W double glass solar ...

It compensates for the intermittent nature of PV power generation at night, realizes the stable and sustainable output of power supply, and is more friendly to the power system.

LONGi is more than a product supplier, offering project consultation, design, installation, procurement, commissioning, operation and maintenance, and financing expertise.

LONGi has launched its groundbreaking Hi-MO X6 bifacial dual-glass module at the 19th edition of China's International Solar Energy Utilization conference in Jinan.

Designed for versatility, the Hi-MO X6 Bifacial Dual-Glass modules cater to a wide range of PV application scenarios, such as distributed roofs, PV carports, and winter gardens.

Discover bifacial glass-glass modules from LONGi - for maximum energy yields, extreme resilience and long-lasting performance in demanding PV projects.

Today, LONGi is part of a community of world-leading producers of monocrystalline silicon panels. In 2016, they launched mono-PERC modules with integrated PERC technology on monocrystalline ...

Featuring advanced dual-glass construction and cutting-edge HPBC cell technology, it ensures superior energy yield, enhanced safety, and excellent resistance to environmental stress. Its modern design ...

With the same surface area, LONGi's HPBC 2.0 dual-glass modules increase installed capacity by 5% compared to TOPCon modules, achieving an 8.56% power generation gain, the ...
