

State-owned utility CFE is constructing a 190MW battery storage unit co-located with a 1GW solar PV project, which is due for completion in 2028 (Energy Storage News, 2023).

By implementing a combination of measures, including subsidies for local production, tariff exemptions for key equipment imports, and tax incentives for technology transfers, Mexico plans to ...

With supportive policy momentum and proven technology providers such as Pytes, battery energy storage is set to become a defining force in Mexico's energy transition.

The Mexican government has announced the approval of 20 private renewable generation projects with a combined installed capacity of 3,320 MW and 1,488 MW of energy ...

Mexico's energy sector is undergoing a major transformation, with energy storage playing a crucial role in its future. The newly established regulatory framework sets the foundation for ...

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...

Turkish company Kontrolmatik/Pomega and Mexican group Jebla have announced a joint investment of US\$400 million to establish a domestic energy storage ecosystem, marking a ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of energy ...

This initiative combines cutting-edge battery storage solutions with renewable energy integration to address grid stability challenges. Let's explore how this project is reshaping Mexico's clean energy ...

This reflects a significant commitment to strengthening Mexico's energy infrastructure, aimed at improving the stability and efficiency of the national electricity system, where battery ...
