

# Moldova wind power energy storage system price

The tender targets investors developing onshore wind power plants in the Republic of Moldova, with supported capacity of up to 170 MW, coupled with mandatory electricity storage.

The winning bids will be those with the lowest price compared to the ceiling price of MDL 1.44 (EUR 0.073) and not exceeding the cumulative capacity of 170 MW. The power plants will be built based ...

Moldova launched its first-ever large-scale green energy auction, targeting 165 MW total (105 MW wind + 60 MW solar). Investors who win were to receive 15-year fixed-price contracts, with ...

The upcoming Moldova wind and storage tender will support up to 170 MW of new onshore wind capacity combined with mandatory battery energy storage. Bid submission is expected in March ...

Moldova has recently launched a new auction for the construction of wind power plants with a total capacity of 170 MW. For the first time, they will be accompanied by energy storage systems of 44 MWh.

With transparent pricing and a solid regulatory environment, this auction offers compelling potential for developers interested in wind plus storage solutions in Eastern Europe.

Winning bids will be those offering the lowest price relative to the ceiling price of 1.44 MDL and not exceeding the cumulative capacity of 170 MW. The wind farms will be constructed ...

The tender operates under a fixed price/variable premium support scheme, with winning bids expected to be below a maximum price of 1.44 Moldovan Lei (approximately 0.073 Euro) per ...

Fixed price for 15 years - for solar installations above 1 MW and wind installations above 4 MW, with capacities allocated through auctions.

Bids that propose the lowest price, not exceeding the ceiling price of 1.44 lei, and within the cumulative capacity limit of 170 MW, will be declared winners. The power plants will be built ...
