

"Solar isn't just an option here - it's becoming a necessity for economic and environmental survival," says a local energy official.

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce emissions.

Australian module manufacturer Tindo Solar has supplied 70 of its 430W N-Type bifacial Walara solar modules to power data cable landing stations for the East Micronesia Cable System (EMCS)...

Implementing these tips will help you navigate the solar panel installation process in Micronesia successfully. By leveraging expert advice and making informed decisions, you can contribute to a ...

A total of 10 feasibility studies are being carried out across 10 separate islands in the Chuuk group of the Federated States of Micronesia. These studies will determine the best way to ensure the ...

New grid-connected solar generation and battery storage systems in Chuuk and Pohnpei will help FSM meet its goal of 70 percent renewable electricity by 2030, while cutting greenhouse gas emissions and insulating ...

On Yap, another pristine island on the other side of Micronesia's territory, they are planning to install a 1.95 MW ground-mounted photovoltaic solar system together with a battery storage system. The ...

A tender is open in Micronesia for the engineering, procurement and construction of hybrid solar minigrid systems at three villages on the Fefen Islands.

With weather patterns steadily intensifying over time, renewable energy's steady traction and momentum and an ambitious goal of net zero emissions by 2050, a green future is not only necessary, but ...
