

"Think of supercapacitors as the sprinters of energy storage," says Dr. Lena Fjellström, project lead at Nordic Energy Research. "They're not here to replace marathon-runner batteries, but to handle those ...

Summary: The Nordic Gravity Energy Storage Power Station Project represents a cutting-edge approach to storing renewable energy. This article explores its technical innovations, environmental benefits, and ...

Hydro plans to build a new pumped storage power plant in Luster Municipality, Norway. With construction starting in 2025 and operations beginning in 2028/2029, the total investment for the project is ...

It is an honor to inaugurate the largest energy storage investment in the Nordic region. Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and enabling increased energy ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into ...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's ...

This article explores the Nordic energy storage market's unique opportunities, technological innovations, and practical applications for commercial and industrial users.

The Elektra Energy Storage Project, Sweden's largest battery storage project, is now fully operational. Located in Landskrona, southern Sweden, the project will provide ancillary services to help balance the grid for ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries ...

"Thanks to the efforts of Ingrid Capacity and BW ESS, we are reducing grid congestion and increasing power generation." Flexible solutions such as large-scale battery storage have proven to be both ...
