

Our ground-breaking, first-of-its-kind, research centre for battery technology and cell production. The 1 GWh battery factory and industrialisation centre for delivering and scaling battery cells. Our three 14 ...

A giga-scale factory for battery cell production located in Mid-Norway. Utilizing renewable energy, we are spearheading the development of a sustainable and competitive Norwegian industry focused on ...

We take pride in designing and producing our Battery Storage Systems in Norway, maintaining full control over quality, safety, and supply chain integrity. EKODA is your trusted production and ...

Nordic Batteries' automated production process enables cost efficient battery production in Norway. At its facility in Kongsberg, the company has developed a world-leading robotic pilot line ...

Production is set to start in 2026, with an annual capacity of 40 GWh (equivalent to supplying batteries for 800,000 electric vehicles) and a EUR 3 billion investment by 2030, creating thousands of jobs in ...

ARENDAL, Norway, Aug 16 (Reuters) - Battery start-up Morrow on Friday opened Norway's first battery cell production site on the country's south coast, with plans to deliver the first units by...

Nordic Batteries manufactures its eENERGY high-energy battery modules and ePOWER high-power battery modules in Norway using battery cells from Norwegian manufacturers and its own ground ...

Norwegian battery cell producer Morrow Batteries has opened Europe's first lithium iron phosphate (LFP) gigafactory with an annual production capacity of 1 GWh in a bid to supply the ever ...

The factory comprises a robotized and digitized production line with eight robotic stations with a capacity of up to 300 megawatt hours (MWh) per year. From unpacking the incoming ...

This ambitious project will be developed in phases, beginning with the 1 GWh Morrow Cell Factory, which is located in Arendal, Norway and has officially started operation.
