

SolarPower Europe, supported by the Global Solar Council (GSC), and the Middle East Solar Industry Association (MESIA), launches its report on solar investment opportunities in Oman.

While the price of fossil fuels has increased, the per watt price of solar energy production has more than halved in the past decade - and is set to become even cheaper in the near future as better ...

Solar energy will play a pivotal role. It will help Oman achieve energy independence. It will also ensure environmental sustainability. Oman's aggressive push into renewables and green hydrogen shows ...

Oman more than doubled its renewable energy share to 11.5% in the first five months of 2025, driven by solar output and major project rollouts.

Oman has launched several high capacity solar projects designed to supply significant portions of the national grid. These mega installations not only generate clean electricity but also ...

Oman reached a milestone in 2024, with renewable energy production hitting 2.4 terawatt hours (TWh), marking a growing commitment to diversifying its energy mix and boosting sustainable ...

The report said that Oman's current electricity mix is primarily based on natural gas, accounting for 96% (38 TWh) of power generation in 2022, compared to solar at 3.8% (1.5 TWh).

Solar energy is a vital and strategic solution for the provision of electricity in the Sultanate of Oman. Given the vast unused land and available solar energy resources, Oman has an excellent ...

For Oman, this moment offers a distinct opportunity to convert its natural solar advantage into long-term energy independence, competitive hydrogen production and regional leadership in ...

Significantly, rising demand for solar rooftop and ground-mounted systems has sparked a proliferation of contractors, including many Omani-owned and operated, in the Sultanate.
