

Transcend empowers the world's first national photovoltaic energy storage demonstration platform (Daqing Base) to successfully overcome the extreme cold challenge!...more

According to the latest news released by China State Power Investment Corporation, the world's first photovoltaic and energy storage outdoor empirical experimental platform built by the ...

From atop a 40-meter monitoring tower in Daqing in northeast China's Heilongjiang Province, a vast field of photovoltaic panels can be seen, shimmering toward the horizon. This is the snappily-named ...

"The empirical experimental platform can obtain valuable measured data, help enterprises improve product performance, improve manufacturing quality, and make products more suitable for actual ...

For meteorology, components, inverters, supports, photovoltaic systems, energy storage products, and light storage systems, Xie Xiaoping, director of the platform Academic Committee, ...

"The platform has eight major positions: product demonstration, technical experiment, performance testing, quality certification, system solutions, innovative practice, industry promotion and ...

On the morning of the 13th, the 2022 data results of the National Photovoltaic and Energy Storage Demonstration Experimental Platform (Daqing Base) were released in Daqing City, Heilongjiang ...

As a head enterprise in the power and energy storage battery industry, with leading technology, product capability and rich experience in the application of energy storage market, CALB is a major player in ...
