

U.S. solar module manufacturing capacity reaches over 31 GW in Q2 2024 under new federal incentives but continues to face resistance. This report explores the ongoing expansion and ...

o Utility-scale solar (including PV and CSP technologies) and C& I PV electricity production dropped by 46% from its summer peak (July 2024) to its winter low (December 2024), ...

BloombergNEF maintains a tiering system for photovoltaic (pv) module (solar panel) manufacturers based on bankability, to create a transparent differentiation between the numerous ...

China, the US and India will remain the top three largest PV markets while Saudi Arabia will experience the fastest pace of growth until 2034, driven by ambitious tenders and the ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Overall, photovoltaic (PV) solar accounted for 69% of all new electricity-generating capacity additions in the first quarter of 2025, remaining the dominant form of new electricity ...

Ten domestic solar projects were announced in Q2, according to data from environmental advocacy group E2. NorSun invested \$620 million in its first U.S. solar facility. The ...

Discover the Tier 1 list of solar panel manufacturers for the second quarter of 2025, published by BloombergNEF.

The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for ...

Discover the top Tier 1 solar panel manufacturers of 2025 with this updated list. See what panel manufacturers make Q1, Q2, Q3, & Q4.
