

NLR develops data and tools for modeling and analyzing photovoltaic (PV) technologies. View all of NLR's solar-related data and tools, including more PV-related resources, or a selected list ...

Solar & Storage Marketplace Report 2025 Data from H1 2025 EnergySage released its 21st EnergySage Solar & Storage Marketplace Report, which analyzes millions of transaction-level data points from ...

Learn more about how to search for data and use this catalog. For a list of search operators, please see the ["Search in Detail"](#) instructions. The NREL PVDAQ is a large-scale time-series database ...

The following resources provide information on a broad range of storage technologies.

This research presents a data-driven approach to address these challenges. A novel method is proposed for estimating the capacity of DER, including PV and energy storage systems ...

Each quarter, we gather data on US energy storage deployments, prices, policies, regulations and business models. We compile this information into this report, which is intended to provide the most ...

U.S. Distributed Solar and Storage Data Berkeley Lab collects, cleans, and publishes project-level data on distributed* solar and distributed solar+storage systems in the United States. The data are ...

Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Solar Energy Data refers to information related to solar energy production, consumption, and infrastructure. Examples of Solar Energy Data include solar irradiance levels, solar panel efficiency, ...

Search the NLR publications database to access our full library of energy storage publications.
