

The primary aim of this Global Solar Atlas is to provide quick and easy access to solar resource and photovoltaic power potential data globally, at a click of a mouse.

This report aims to provide findings for high-level comparisons between countries and regions on their solar energy potential and is intended to raise awareness, stimulate investment interest, and inform ...

The Global Solar Atlas is an online tool that provides an overview of solar energy potential for a site or region.

The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (<1 ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

Free and open access to photovoltaic (PV) electricity generation potential for different technologies and configurations. Available in English, French, Italian, Spanish and German.

The objective of the Global Solar Atlas is to provide reliable introductory-level data to help policymakers, researchers, and commercial solar companies take better decisions.

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential sites for solar power generation virtually ...

Responding to client's needs, ESMAP and its partners have created a free, web-based tool--the Global Solar Atlas--that can help identify potential ...
