

This study examines the effects of tariffs imposed by the United States on imported solar panels. We first provide definitive evidence that tariff-exposed firms shifted production to locations that did not face ...

As people see more grid-scale solar development (GSSD) pop up on the landscape, they may wonder if these installations have adverse effects on human or animal health.

This study examines the effects of tariffs imposed by the U.S. on imported solar panels. We first provide clear evidence that tariff-exposed firms shifted production to locations that did not face ...

Over the last thirty years, hundreds of life cycle assessments (LCAs) have been conducted and published for a variety of residential and utility-scale solar photovoltaic (PV) systems. These LCAs ...

What can I do to avoid and minimize impacts to birds? Burying or installing collector lines below PV panels, burying or co-locating generation tie lines with existing infrastructure, and limiting the length ...

Solar panels take considerable resources and energy to manufacture, in addition to transporting and deploying these technologies. To assess this impact, a lifecycle analysis is used to assess the ...

anti-dumping duties on clothes washers from South Korea and China. Using our model, we quantify the welfare impacts of tariffs on solar panels, accounting for offshoring behavior by firms. We find that the ...

We have received a number of inquiries regarding the implications of the new solar panels antidumping (AD) and countervailing duty (CVD) investigations. With the ITC just issuing its ...

This study examines the effects of a series of tariffs imposed by the United States on imported solar panels in 2012, 2014, and 2018. To do so, we bring together data on solar panel ...
