

Get the most out of your solar panels with integrated monitoring. Read data directly from many inverters with our commercial-grade gateway, or measure production with our electric meter.

The Federal Energy Management Program (FEMP) provides this tool to federal agencies seeking to procure solar photovoltaic (PV) systems with a customizable set of technical ...

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

NLR develops data and tools for modeling and analyzing photovoltaic (PV) technologies. View all of NLR's solar-related data and tools, including more PV-related resources, or a selected list ...

Solar installers, system integrators, and sellers can use our advanced technical filters to find the exact PV panels that match their needs. We have collated panel data from manufacturers from all around ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

Enter a state, county, city, or zip code to see a solar estimate for the area, based on the amount of usable sunlight and roof space.

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.
