

Since 2017, Skeleton is collaborating with Polish genset producers to use our ultracapacitors in locomotives made by Poland's leading producer of railway vehicles.

Skeleton's SkelMod and SkelStart supercapacitor modules offer a lot of power in compact, industry-standard form factors. Highest performance and quality for automotive, transportation, grid, and ...

A powerful module for reliable engine starting for diesel engines in any weather conditions. Based on Skeleton's industry-leading supercapacitors, offering unparalleled power.

Supercapacitors are being used to power buses in Chinese cities, allowing about 15 km on one charge - and recharging takes about five minutes. Supercapacitors can also be used to power the robots used ...

Skeleton Technologies and ZPUE, the largest manufacturer of electrical devices for electrical power distribution utilities in Poland, have entered into a commercial agreement to provide ...

Our modules combine advanced supercapacitor cells to offer exceptional durability and a long lifespan, perfect for demanding industrial and commercial applications.

The module is typically used for hybrid buses, light rail, trolleys, seaport cranes, as well as construction and mining vehicles. The PSS module meets IEC 16750-3 table 12 vibration requirements and IP69 ...

Supercapacitors represent a new generation of energy storage. The paper demonstrates that the use of supercapacitors presents an opportunity to increase the share of solar and wind ...

The supercapacitor module guidelines application note provides detailed information on Eaton's supercapacitor module technology, operational characteristics, rating definitions and lifetime ...

Increase the energy available for your application by using a higher voltage and capacitance standard or custom module.
