

Public Opinion on Energy Storage Battery Projects

Energy storage is not a new phenomenon, given the early history of harnessing power through water wheels and mill ponds, but in recent years, storage has gained increased attention with ...

SAN DIEGO, CA, June 24, 2025 - A newly released public opinion survey finds that San Diego County residents overwhelmingly support the clean energy transition--and the battery energy storage ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials...

Energy storage projects are facing increasing scrutiny from local residents in parts of the U.S. Residents have voiced concerns about fires at energy storage facilities - in particular, lithium ...

Large lithium-ion-based power banks are starting to become a large part of the green energy solutions everywhere energy is harvested through sun or wind. However, there are fire risks ...

Learn strategies to address and overcome community opposition to Battery Energy Storage System (BESS) projects.

A recent nationwide survey reveals that the majority of U.S. residents support battery storage projects, especially when these systems deliver reliable power, lower electricity bills, and ...

But as more energy storage is added, residents in some places are pushing back due to fears that the systems will go up in flames, as a massive facility in California did earlier this year.

Battery storage is considered a key component in supporting renewable energy integration and grid stability. While most respondents express support for BESS projects, ...

Battery energy storage systems (BESS) are growing rapidly on the U.S. grid, but the technology has faced some headwinds. The primary technology being installed, lithium-ion storage ...
