

Click the images below to view maps of concentrating collector and tilted photovoltaic panel solar energy resources on BLM-administered lands in the six-state PEIS study area. These maps are based on ...

Interactive U.S. Solar Farms & Solar Parks Map showing plant boundaries, owners, nameplate capacity (MW), and power output. Based on EIA-860/860M/923. Filter by utility-scale photovoltaic and CSP ...

View an interactive map or download geospatial data on solar photovoltaic supply curves.

Open map of the world's electricity, telecoms, oil, and gas infrastructure, using data from OpenStreetMap.

The Power Plants and Neighboring Communities Mapping Tool (PPNC) is an interactive map that displays socioeconomic information of communities, along with the location and operating ...

This interactive map examines the viability of three solar technologies in the United States with a high-level annualized economic calculation, with and without potential savings from available renewable ...

View solar supply curve data, which include latitude, longitude, available area, capacity potential, generation potential, generator capacity factor, and distance to interconnect.

The layer, U.S. Electric Power Transmission Lines (Archive), has configurations that are not supported in Map Viewer Classic. To ensure the best experience, open the layer in Map Viewer.

Find and download solar resource map images and geospatial data for the United States and the Americas. For more information on NLR's solar resource data development, see the National Solar ...

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.
