

Summary: Slovenia is rapidly adopting advanced energy storage systems to support renewable integration and grid stability. This article explores the latest technologies, market trends, and ...

Slovenia's HSE signs a EUR100M deal for 80 MW of new solar power plants with integrated battery storage, advancing the nation's renewable energy goals for 2050.

State-owned utility and power generator HSE is targeting 800MW of flexibility assets across Slovenia by 2035, including pumped hydro energy storage (PHES) and battery energy ...

Search all the announced and upcoming battery energy storage system (BESS) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Slovenia with our comprehensive ...

Businesses in Slovenia often face rising energy costs and a need for reliable power sources. This energy storage system addresses these challenges by providing a stable and eco ...

Slovenia has added three large solar projects to its national Development Program Plan for 2026-2029, paving the way for new solar capacity to enter the grid from late 2027 and early 2028. ...

EU-backed solar and storage project moves forward in Slovenia. As we reported earlier, the Slovenian state-owned power company, Holding Slovenske elektrarne (HSE), will build two ...

Slovenia selected a range of PV, battery storage and grid projects eligible for support via the European Union's Modernisation Fund.

Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by 2035, including 590MW of pumped hydro energy ...

As part of the increase of the volume of systemic services, envisaged in the first phase is the installation of an energy storage facility of the size class of 6 to 10 MW. The installation is envisaged within the ...
