

How much does a solar panel cost?

Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market benchmarks thereafter due to limited data availability. Solar photovoltaic module prices refer to the cost of the solar panel itself, and do not include installation or other system components.

How much does solar cost per watt?

The industry standard measurement for comparing solar costs is price per watt (\$/W). According to the National Renewable Energy Laboratory's Spring 2025 Solar Industry Update, residential solar costs average around \$2.56 per watt before incentives, with most systems ranging from \$2.56 to \$3.03 per watt. Factors affecting cost per watt include:

How much does a 12 kW solar panel cost?

Your state's averages matter more than national numbers, and factors like shading, roof complexity, and local incentive programs all play a role in your final price. The average cost of a 12 kW solar panel installation on EnergySage is \$30,505 before available incentives.

How much does a solar inverter cost?

The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt.

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop cost benchmarks to measure progress ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel ...

Solar Panel Costs in 2026 : It's Usually Worth It Average Total Cost: \$21,816 - \$26,004 Average Cost per watt: \$3.03 Get solar power system costs based on your location, roof, power usage, and current ...

* How much does a solar panel cost? Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel ...

2025 solar panel cost: price per watt, installation cost breakdown, and total cost of ownership. See incentives, ROI, and state pricing. Get your free quote.

PRICE INDEX | January 2026 Photovoltaic Price Index Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main ...

Compare quotes using "cost per watt." Like price per square foot for homes, this metric (typically \$2 to \$3 per watt) helps you compare solar companies fairly, regardless of system size.

Understanding solar costs means looking beyond sticker prices. Right now, systems average about \$2.58 per watt before incentives. But this ...

Get a clear explanation of solar panel cost per watt, what affects pricing, and how to compare quotes so you can make a smart investment in solar energy.

Understanding solar costs means looking beyond sticker prices. Right now, systems average about \$2.58 per watt before incentives. But this number varies depending on your location, ...

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation.
