

Among the myriad approaches to integrating solar energy into business operations, Solar Power Purchase Agreements (Solar PPAs) have emerged as a strategic and popular choice. These ...

A Power Purchase Agreement (PPA) secures the payment stream for a Build-Own Transfer (BOT) or concession project for an independent power plant (IPP). It is between the purchaser "oftaker" (often ...

Solar PPAs are agreements where a solar power provider installs and maintains solar panels on a host customer's property, generating electricity that is then sold to the customer. On-site ...

This SPPA template document was developed by a group of solar developers, law firms, and other interested parties in the solar energy space. It represents a consensus around one ...

A solar power purchase agreement (PPA) is a financial agreement where a developer arranges for the design, permitting, financing and installation of a solar energy system on a ...

Our standard contracts and securitization resources include example contracts, operation and maintenance guides, and a mock filing with ratings agencies for photovoltaic (PV) systems.

Solar can be hosted on buildings that you do not own, and you can receive the economic and environmental benefits of such solar projects (depending on leases and building owner preferences), ...

Utility and commercial PPA projects are assumed to sell electricity through a power purchase agreement at a fixed price with optional annual escalation and time-of-delivery (TOD) factors.

A host customer agrees to have solar panels installed on its property, typically its roof, and signs a long-term contract with the solar services provider to purchase the generated power.

This guide will walk you through what a PPA is, how it benefits those who buy solar electricity (often called the "oftaker"), and how PPAs are linked to tax equity partnerships and the ...
