

What is a solar camping shower?

For many campers, an outdoor solar shower is a great way to take a nice summer shower in nature. Today we're looking at solar camping showers that are popular with car campers, van campers, RVers, and even backpackers. A solar outdoor shower lets you take your shower with you wherever you go. 1) What Is a Solar Shower?

How to make an outdoor solar shower?

Regardless of the type, stability is a must, so there won't be any interruption when you take a shower. To make an outdoor solar shower you are going to need a water tank that absorbs radiation from the sun to heat up the water. For a solar shower bag, you are just going to need a bag with a shower hose and head to hang.

How much water does an outdoor solar shower take?

It depends on what type of outdoor solar shower you are going to use, but most units have a tank capacity of 2.5 to 10 gallons of water. Some even higher. It mostly depends on how well exposed it is to the sun and how much water there is. But a standard 5 gallons of water sun will be hot enough after 2 to 3 hours.

Can You DIY a solar camping shower?

But there's also a DIY option. That third type of solar camping shower has become popular with van campers. It involves using black PVC pipe to create a roof-mounted solar camping shower. Here's a video showing how to build and use a rooftop outdoor solar shower for your RV:
