

Neoen, France's leading independent producer of exclusively renewable energy, has provided Bouygues subsidiary Equans Solar & Storage with notices to proceed for three solar farms ...

Project Pipeline: France's project pipeline remains robust, with over 6 GW in the grid connection queue holding signed preliminary DSO contracts and another 19 GW of projects with ...

Floating solar panels will become part of a hybrid photovoltaic project in France, continuing a growing trend for renewable energy in tight spaces.

The choice of a specific technology for the structures supporting the solar panels with trackers 1 and the implementation of an appropriate irrigation system will enable farming activities to ...

DAS Solar has contributed to a major floating solar project commissioned in the Haute-Marne region of France. With a total installed capacity of 74.3MWp, the project stands as the largest ...

Neoen has initiated construction of three new solar farms in France with a combined capacity of 230 MWp, all scheduled to become operational by 2028. The projects include the Le ...

Neoen Begins Construction of Three Solar Farms in France Neoen, a leading renewable energy producer, has officially commenced construction on three new solar farms in France. This ...

The plant features over 135,000 solar panels mounted on cutting-edge floating platforms, all designed and built in France. This ambitious project will generate enough electricity to meet the ...

Voltalia has commenced construction on three new solar power plants in southern France, totaling a combined capacity of 25.1 megawatts. The first project, a 10.7 MW photovoltaic ...

Neoen's 300 MW Cestas solar park, commissioned in 2015, remains France's biggest PV plant and the only one in the country that contributes to grid stability, even at night.
