

How many solar panels do I Need?

The number of solar panels you'll need for your home will vary based on factors specific to you, including the size of your home, energy needs, and location. However, the average home needs between 17 and 21 solar panels to completely offset utility bills.

Are solar panels a good choice for your home?

Even the best solar panels may perform poorly in difficult conditions. Some panels are better suited for small spaces, while others excel in hot temperatures. That's why it's so important to consider your roof, household electricity use, and climate when choosing solar panels for your home.

How to choose a residential solar panel?

So, if you live in a hot climate, ensure you pick a panel with a lower coefficient ($-0.35\%/^{\circ}\text{C}$ is the industry average), as this will ensure better savings and higher energy production. Panel efficiency and wattage: Choose a residential solar panel with efficiency and wattage ratings that match your home's energy needs.

What factors should you consider when buying a solar panel?

Efficiency range (20 points): Solar panel efficiency is one of the most important factors to consider when looking for a new solar panel for your home. Efficiency is how much energy a solar panel can convert from the sun into usable energy for your home.
